## ABOUT R FOR ANALYTICS

This course provides a comprehensive introduction to programming in R, equipping learners with the skills to perform effective data analysis. Participants will gain hands-on experience in setting up and configuring the tools required for a robust statistical programming environment. The course also covers essential programming concepts, as implemented in R, a high-level statistical language widely used in data science.

### Course Objectives

- Develop proficiency in statistical computing, including:
  - Programming in R.
  - Importing and managing data within R.
  - Utilizing and accessing R packages.
  - Writing custom R functions to streamline analysis.
  - Debugging and profiling R code for optimization.
  - Organizing, documenting, and commenting on R scripts for clarity and collaboration.

### Who Should enrol?

- Aspiring data scientists looking to build foundational R programming skills.
- Current business data analysts or scientists seeking to enhance their expertise in statistical computing and data analysis.

**Mode of Delivery:** Online

**Estimated Effort:** 58 hours

### Instructors:

- GIDEON CHIKAMAI INGUTIAH, Msc, MBA (Executive Director – ZYLLOO CONSULT LTD, Deputy Director - NCTCCA)
- DR. LEACKY MUCHENE (Janssen Pharmaceutical Companies of J&J, Netherlands)

**Organizers:** ZYLLOO CONSULT LTD

**Technical assistance:** CHESA KWEYU (Statistician)

### Course Timetable for 2025

Course	Delivery Mode	Start Date	End Date	Duration	Frequency
<b>Artificial Intelligence in R</b>	Online/Physical	Jan 15, 2026	Feb 26, 2026	6 weeks	Twice a year
<b>R for Analytics intermediate</b>	Online/Physical	Mar 15, 2026	Apr 26, 2026	6 weeks	Twice a year
<b>Data Science in R</b>	Online/Physical	May 15, 2026	Jun 26, 2026	6 weeks	Quarterly
<b>Data Science in Python</b>	Online/Physical	Jul 15, 2026	Aug 26, 2026	6 weeks	Quarterly
<b>Artificial Intelligence in R</b>	Online/Physical	Sep 15, 2026	Oct 26, 2026	6 weeks	Twice a year
<b>R for Analytics Advanced</b>	Online/Physical	Nov 15, 2026	Dec 26, 2026	6 weeks	Twice a year

## R FOR ANALYTICS COURSE CONTENTS & PROGRAMS

### Course 1: Artificial Intelligence in R

**Online: Jan 15 – Feb 26th 2025**

#### Course Description:

This course focuses on leveraging R for Artificial Intelligence (AI), including machine learning, deep learning, and natural language processing. It equips learners with hands-on experience in implementing AI models in R.

Time	Session	Content	Facilitator(s)
	<b>Opening remarks</b>	Speakers and organizers introduction	
	<b>Introduction to the R environment</b>	<ul style="list-style-type: none"> <li>○ Set up a project</li> <li>○ R data structures</li> <li>○ Load internal and external data files</li> <li>○ Base R plotting</li> </ul>	
	<b>Data Wrangling</b>	<ul style="list-style-type: none"> <li>○ Modify objects</li> <li>○ Reshape: melt, cast, gather</li> <li>○ Tidyverse approach</li> <li>○ Summary, mutate, filter, distinct, ungroup</li> </ul>	
	<b>Visualization with ggplot</b>	<ul style="list-style-type: none"> <li>○ Single layer plots</li> <li>○ Multi-layer plots</li> <li>○ Faceting</li> <li>○ Saving in .eps, .pdf</li> </ul>	
	<b>Reproducible research (Rmarkdown + GIT)</b>	<ul style="list-style-type: none"> <li>○ Basic Rmarkdown structure</li> <li>○ Transfer day's code to RMarkdown</li> <li>○ Compile html, pdf</li> </ul>	
	<b>Introduction to AI Concepts in R:</b>	<ul style="list-style-type: none"> <li>○ Overview of AI, ML, and DL.</li> <li>○ Importance of R in AI.</li> <li>○ Installation and configuration of relevant R libraries (e.g., caret, tensorflow, keras, nnet).</li> </ul>	
	<b>Supervised Learning Models:</b>	<ul style="list-style-type: none"> <li>○ Linear and Logistic Regression.</li> <li>○ Decision Trees, Random Forests, Gradient Boosting (e.g., XGBoost, LightGBM).</li> <li>○ Performance metrics (accuracy, precision, recall, F1 score).</li> </ul>	
	<b>Unsupervised Learning Models:</b>	<ul style="list-style-type: none"> <li>○ Clustering algorithms (K-means, Hierarchical Clustering).</li> <li>○ Dimensionality reduction (PCA, t-SNE).</li> </ul>	
	<b>Deep Learning:</b>	<ul style="list-style-type: none"> <li>○ Introduction to Neural Networks.</li> <li>○ Building feedforward, convolutional, and recurrent networks in R using keras and tensorflow.</li> <li>○ Hyperparameter tuning.</li> </ul>	

Time	Session	Content	Facilitator(s)
	<b>Natural Language Processing:</b>	<ul style="list-style-type: none"> <li>○ Text preprocessing and tokenization.</li> <li>○ Sentiment analysis and topic modeling.</li> <li>○ Text generation with RNNs.</li> </ul>	
	<b>AI in Practice:</b>	<ul style="list-style-type: none"> <li>○ Case studies on real-world applications.</li> <li>○ Ethical considerations in AI.</li> </ul>	

## Course 2: R for Analytics (Intermediate)

**Online: Mar 5 – Apr 26th 2025**

### Course Description:

This course builds on foundational R knowledge to develop intermediate analytics skills, including advanced data manipulation, visualization, and exploratory data analysis.

Time	Session	Content	Facilitator(s)
	<b>Opening remarks</b>	Speakers and organizers introduction	
	<b>Data Manipulation:</b>	<ul style="list-style-type: none"> <li>○ Working with dplyr and data.table.</li> <li>○ Advanced data cleaning techniques.</li> <li>○ Handling missing and outlier data.</li> </ul>	
	<b>Data Visualization:</b>	<ul style="list-style-type: none"> <li>○ Customizing plots with ggplot2.</li> <li>○ Interactive visualizations with plotly and shiny.</li> <li>○ Dashboard creation.</li> </ul>	
	<b>Exploratory Data Analysis (EDA):</b>	<ul style="list-style-type: none"> <li>○ Techniques to summarize data.</li> <li>○ Advanced statistical measures (e.g., correlation, skewness, kurtosis).</li> <li>○ Data distribution visualization</li> </ul>	
	<b>Introduction to Time Series Analysis:</b>	<ul style="list-style-type: none"> <li>○ Basic concepts and applications.</li> <li>○ Visualization and decomposition.</li> </ul>	
	<b>Hands-on Projects:</b>	<ul style="list-style-type: none"> <li>○ Analyzing business/real-time datasets.</li> <li>○ Data-driven decision-making use cases.</li> </ul>	

## Course 3: Data Science in R

**Online: May 15 – Jun 26th 2025**

### Course Description:

This course covers core data science techniques, focusing on machine learning and statistical modelling in R.

Time	Session	Content	Facilitator(s)
	<b>Opening remarks</b>	Speakers and organizers introduction	
	<b>Introduction to Data Science</b>	<ul style="list-style-type: none"> <li>○ Data science workflow.</li> <li>○ Role of R in data science.</li> </ul>	
	<b>Statistical Foundations</b>	<ul style="list-style-type: none"> <li>○ Descriptive and inferential statistics.</li> <li>○ Hypothesis testing</li> <li>○ Confidence intervals.</li> </ul>	
	<b>Predictive Modeling</b>	<ul style="list-style-type: none"> <li>○ Regression and classification models.</li> <li>○ Cross-validation and model evaluation.</li> </ul>	
	<b>Feature Engineering</b>	<ul style="list-style-type: none"> <li>○ Variable selection techniques.</li> <li>○ Encoding categorical variables.</li> </ul>	
	<b>Model deployment</b>	<ul style="list-style-type: none"> <li>○ Exporting models for production.</li> <li>○ Integrating R with web applications.</li> </ul>	
	<b>Capstone Project</b>	<ul style="list-style-type: none"> <li>○ Full-cycle data science project.</li> </ul>	

## Course 4: Data Science in Python

**Online: Jul 15 – Aug 26th 2025**

### Course Description:

This course introduces Python as a powerful tool for data science, covering essential libraries like pandas, numpy, and scikit-learn.

Time	Session	Content	Facilitator(s)
	<b>Opening remarks</b>	Speakers and organizers introduction	
	<b>Introduction to Python for Data Science</b>	<ul style="list-style-type: none"> <li>Setting up Python for data science.</li> <li>Overview of pandas, numpy, and matplotlib.</li> </ul>	
	<b>Data processing</b>	<ul style="list-style-type: none"> <li>Data wrangling with pandas.</li> <li>Handling large datasets with dask.</li> </ul>	
	<b>Machine Learning with scikit-learn</b>	<ul style="list-style-type: none"> <li>Supervised and unsupervised learning.</li> <li>Hyperparameter tuning.</li> </ul>	
	<b>Feature Engineering</b>	<ul style="list-style-type: none"> <li>Variable selection techniques.</li> <li>Encoding categorical variables.</li> </ul>	
	<b>Advanced topics in Python for Data science</b>	<ul style="list-style-type: none"> <li>Deep learning with tensorflow and keras.</li> <li>Natural Language Processing with nltk and spaCy.</li> </ul>	
	<b>End-to-End Data Science Project</b>	<ul style="list-style-type: none"> <li>From Exploratory analysis to deployment.</li> </ul>	

## Course 5: Artificial Intelligence in R (Advanced Version)

**Online: Sept 15 – Oct 26th 2025**

### Course Description:

This advanced course delves into complex AI models and their implementation in R.

Time	Session	Content	Facilitator(s)
	<b>Opening remarks</b>	Speakers and organizers introduction	
	<b>Advanced machine learning</b>	<ul style="list-style-type: none"> <li>Ensemble methods and stacking models.</li> <li>Anomaly detection.</li> </ul>	
	<b>Deep Learning Optimization</b>	<ul style="list-style-type: none"> <li>Transfer learning.</li> <li>Optimizing neural networks for efficiency.</li> </ul>	
	<b>AI for Big Data</b>	<ul style="list-style-type: none"> <li>Working with large datasets using sparklyr.</li> <li>Distributed machine learning</li> </ul>	
	<b>AI Applications</b>	<ul style="list-style-type: none"> <li>Recommender systems.</li> <li>Image recognition.</li> </ul>	

## Course 6: R for Analytics (Advanced)

**Online: Nov 15 – Dec 26th 2025**

### Course Description:

This advanced course equips learners with skills for sophisticated analytics, focusing on predictive modeling and advanced visualization.

Time	Session	Content	Facilitator(s)
	<b>Opening remarks</b>	Speakers and organizers introduction	
	<b>Advanced Statistical Analysis</b>	<ul style="list-style-type: none"> <li>○ Ensemble Bayesian inference.</li> <li>○ Advanced time series forecasting.</li> </ul>	
	<b>Predictive Analytics</b>	<ul style="list-style-type: none"> <li>○ Building predictive pipelines.</li> <li>○ Advanced regression techniques.</li> </ul>	
	<b>Data Visualization Techniques</b>	<ul style="list-style-type: none"> <li>○ Advanced themes and interactivity.</li> <li>○ Geographic visualizations.</li> </ul>	
	<b>Real-world Applications</b>	Analytics in marketing, healthcare, and finance
